10) The annual management fee schedule is as follows: 1.50% on the first \$1 million of market value, 1.30% on the next \$1 million, 1.20% on the next \$3 million, 1.10% on the next \$5 million, 1.00% on the next \$10 million, and 0.90% on the balance over \$20 million.

11) This composite was created on January 1, 1993.

12) Benchmark returns are those for a blend of the Morningstar average "U.S. Diversified Domestic Equity" (65%) mutual fund & average International Equity" (35%) mutual fund, annually rebalanced on Dec. 31. The performance figures given for the Morningstar benchmark have been adjusted by KIM in order to remove the survivor bias from the historical data.

13) The minimum portfolio size for this composite is \$100,000.

14) Due to the use of preliminary pricing for an investment partnership, returns may change slightly upon receipt of audited prices.

15) Starting December 31, 2005, the composite used for calculating the equity performance was altered to include all of the accounts containing equity product, eligible for the composite at Karpus Investment Management.

16) This carve-out represents 46.18% of the aggregate composites used to create the carve-out composite. Cash returns have been allocated pro-rata between the international equity and other segments of the Balanced Composite.

Karpus Investment Management has prepared and presented this report in compliance with the Global Investment Performance Standards (GIPS®). The CFA Institute has not been involved in the preparation review or approval of this report.

- 1) Karpus Investment Management is an independent investment management firm founded in 1986. It is not affiliated with any parent organization. It provides balanced, equity, fixed income and cash management for individuals and institutional clients.
- 2) Total Assets and Total Firm Assets are as of 12/31. Rate of return figures are for periods ending on 12/31.
- 3) Valuations and returns are computed and stated in U.S. dollars.
- 4) Rate of return figures reflect the reinvestment of all dividends, interest and other income.
- 5) Composite total return figures are annualized (geometrically linked) monthly dollar-weighted returns.
- 6) The dispersion of composite annual returns is measured by the standard deviation of net returns of the portfolios in the composite. These returns are the annual dollar-weighted returns of those composite component portfolios that existed in the composite for the entire calendar year period.
- 7) Performance results are net of management fees and transaction costs. Figures are also net of custodial fees for accounts custodied at U.S. Bank. Such accounts currently comprise approximately 65% of the assets under management for the firm. Clients directing the use of other ("outside") custodians are responsible for custody fees and pay them either directly from the account or separately. For these portfolios, the stated returns are gross of custodial fees.
- 8) In order to value closed-end fund auction rate preferred securities, Karpus Investment Management used a monthly weighted average valuation provided by an independent third party; which operates, to our knowledge, the largest secondary market for auction rate securities. Effective 11/30/2008, Karpus Investment Management decided to change the method of pricing auction rate preferred securities due to the large price range at which different issues were trading. Karpus Investment Management now prices auction rate preferred securities based on the last transaction price of each specific issue.
